

1. Creating IAM user (with out access)

Make sure that you are creating a user called "ajay"

The image shows the AWS IAM console interface. At the top, the 'Services' section is visible, with 'IAM' highlighted and a red box around it. Below this, the 'Identity and Access Management (IAM)' page is shown. In the left-hand navigation menu, 'Users' is highlighted with a red box. The main content area displays 'Users (3)' with a list of existing users: 'mcb6-automation-user', 'MCDAI-AUTOMATION-USER', and 'shaan'. At the bottom of the console, the 'Create user' button is highlighted with a red box.

- Policies
- Identity providers
- Account settings
- Root access management
- Temporary delegation requests

Users (3) Info

An IAM user is an identity with long-term credentials that is used to interact with AWS

Search

☐	User name	Path	Group
☐	mcb6-automation-user	/	0
☐	MCDAI-AUTOMATION-USER	/	0
☐	shaan	/	0

Users (3) Info

An IAM user is an identity with long-term credentials that is used to interact with AWS in an account.

Search

☐	User name	Path	Group	Last activity	MFA	Password age	Console last sign-in
☐	mcb6-automation-user	/	0	116 days ago	-	-	-
☐	MCDAI-AUTOMATION-USER	/	0	16 days ago	-	-	-
☐	shaan	/	0	1 minute ago	-	29 days	1 minute ago

Create user

- Step 1
Specify user details
- Step 2
Set permissions
- Step 3
Review and create
- Step 4
Retrieve password

Specify user details

User details

User name

ajay

The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)

☒ Provide user access to the AWS Management Console - optional

In addition to console access, users with `SignInLocalDevelopmentAccess` permissions can use the same console credentials for programmatic access without the need for access keys.

Console password

☐ Autogenerated password

You can view the password after you create the user.

☒ Custom password

Enter a custom password for the user.

• Must be at least 8 characters long

• Must include at least three of the following mix of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbol

☐ Show password

☒ Users must create a new password at next sign-in - Recommended

Users automatically get the `IAMUserChangePassword` policy to allow them to change their own password.

ⓘ If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. [Learn more](#)

Set permissions

Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. [Learn more](#)

Permissions options

☒ Add user to group

Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.

☐ Copy permissions

Copy all group memberships, attached managed policies, and inline policies from an existing user.

☐ Attach policies directly

Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.
