

Vendors Supporting SQL DB

SQL

Oracle Database, Microsoft SQL Server, IBM Db2, PostgreSQL, MySQL, MariaDB, SQLite

Amazon RDS, Amazon Aurora, Azure SQL Database, Google Cloud SQL, Oracle Autonomous Database

Vendors Supporting Graph DB

- 1. Neo4j**
Best for learning GraphDB because Cypher is easy.
- 2. Amazon Neptune**
Best managed graph option on AWS.
- 3. TigerGraph**
Best for large-scale graph analytics and fraud.
- 4. ArangoDB**
Best for multi-model graph + document + vector use cases.
- 5. Memgraph**
Best for open-source, real-time, Cypher-compatible graph workloads.
- 6. Ontotext GraphDB / Stardog**
Best for semantic knowledge graphs and ontologies.

What is SQL ? & Why we use it ??

Its nothing but a language or group of syntaxes we follow to communicate with database & their tables

What is CIPHER ? & Why we use it ??

Its nothing but a language or group of syntaxes we follow to communicate with GRAPH database
